Clinician experiences questionnaire for home parenteral nutrition (HPN) patient access during Covid-19 pandemic

We would like to invite you to participate in this international survey promoted by the Home Artificial Nutrition and Chronic Intestinal Failure special interest group of ESPEN (European Society of Clinical Nutrition and Metabolism).

Challenges due to COVID-19 are likely to persist for a long time; we therefore need to urgently evaluate and possibly modify our practice in order to optimise the care provided to patients with CIF.

We aim to collect data on clinicians’ experience of home parenteral nutrition management during the troubled time of the COVID-19 pandemic. The results of the questionnaire will help the “ESPEN CIF community” develop advice as to how to best adapt our practice during the pandemic.

The filling out of the questionnaire requires around 10 minutes. Your participation is valuable. Thank you in advance for your time.

You may open the survey in your web browser by clicking the link below:
