pH-impedance in practice

Kennedy Lecture Theatre
UCL Great Ormond Street Institute of Child Health, London

The main aim of this course is to support physicians and nurses to develop their skills and understand both the clinical application and indications for reflux monitoring with the pH-impedance study.

In the practical session the trainees will have the opportunity for hands-on analysis, to read and report on a variety of case studies. The attendees will then be able to discuss and compare their findings with the trainers.

What will you learn?

- What is pH-impedance and when to do it
- How to prepare your patient and the equipment
- How to analyse the study and make the final conclusion
- Practical tips on pH-impedance analysis

Topics include:

1. Gastroesophageal reflux in children – short introduction
2. Preparation of the patient and pH-impedance equipment
3. Practical tips for the trace analysis
4. Case studies – hands-on analysis

Course Directors:

Efstratios Saliakellis, Great Ormond Street Hospital for Children NHS Trust

Anna Rybak, Great Ormond Street Hospital for Children NHS Trust

Who should attend?

- Physicians (paediatricians, gastroenterologists), GI physiologists, nurses.
- A maximum of 15 trainees.

Fee: £100.00
